

PARATURK
PARAŞÜT SİSTEMLERİ LTD. ŞTİ.

ATUNUT MKP (MODULAR CARGO PARACHUTE)

ATUNUT MKP Cargo Parachute System is a specially designed solution that enables the airdrop of payloads ranging from 25 to 500 kg, either single or cluster configurations, from fixed or rotary wing aircraft.

It is up to 90% more cost-effective compared to long-life counterparts and has been developed for use in critical missions such as military operations, disaster response, and humanitarian aid.

It can be left behind after a single use or reused multiple times, offering users a high degree of operational flexibility in the field.
